

Slovenian Marxism - Journalism on Recent Changes By Shomit Sirohi

I. From Arcs to Complex Arcs and Concentric Circles, even finally Episteme as Comparative History, in the guise of Greek Historicism in Hyppolite

Complex arcs then produce the 20th Century divided into 1900 - 1950 and then 1950 - 1990 which had a final twist 1990 - 2000 which then periodizes into the complex movement of Trotsky and Lenin in the earlier part which in turn was mediated by American liberal revolutionary format and also produced Taylorism and was in turn mediated by Nazi power destroyed by majorly the Leftist arcs of general insurrection with some small part played by American liberals in the whole game which is also the period which developed the first Communism and anti-colonial independences and a shift to Taylorism and American financial power which in turn led to concentric circles of international finance theory being a element of national colonial competition and even Latin American anti-colonial developmetns which also meant a national circle of in fact reduced returns on investment which was because of domestic capital competing with international and domestic capitals and then of course city circles which developed factory agitation and even peasant agitation against the reduction in rates of wages which was another factor developing totally - Communism as the general working class Turin type council factory developments.

In Graeco-Roman historicism this develops a comparative of in fact the movements of financial gains being mediated by bad accounts and wrong economics and anti-labour politics which then is the comparison in this period 1900 - 1950 of in fact developments of fascism and Nazism because of the developments also of French resistance and Spanish radicalism against dictatorships alongside colonial power in the third world because of wrong economic planning and even a condition of possibility called capitalist success also failing because of state planning in colonial terms.

II. 1950 - 1990 - the Balance Sheet of Soviet Union and Influenced Revolutions of Cuban type

In fact there is radical arcs running through this period in complex types of mass movements of Marxist liberation led by Cuba and Algeria even Chinese mass line which in turn led to Black Panthers movements and even PCF led working class Cultural Revolution in France and parts of Europe with Althusser leading the programmes which then meant also French intellectual culture wedded to Soviet Marxism and developments of English Marxism with working class agitation and in India - a

Nehruvian liberal dominance which then led a Keynesian management of crisis and also had national circles and arcs all of which were Locked in Place by static mode of production problems because of mass bureaucratized Fordism which was the unity of class struggle, bargaining culture and lock outs by state and capital which led in turn to government control of all sectors of the economy - expansion of the state at the cost of financial capitalism.

Finally the Crisis led to the fall of Soviet Union.

III. 1990 - 2000 and then 2000 - 2019 - The Dot.Com Being Liberal first and then Wedded to Far Right potential crisis for a long twenty year crisis

Then of course concentric circles develop a new world and liberalization and dot.com economics which is regulated at first by computer finance transactions and high banking and Fordism mass unionization and victories and gains of Left within democracy of liberal type which then had a international finance theory of World Bank, IMF and EU and even meant arcs after arcs of national social movements and international social movements of the poorest who entered the frame with Sirohi in India one feels leading also student mass protest and movements in India in small however capacity.

The 2000 - 2019 period was an economic crisis with international finance being limited to transactions wedded to media assemblages and financial imperialism from America which in turn was mediated by the self-mediated capitals of forms of semiotized operators which is called cheap Apps and computer finance with the ideological constellations of far right and mass media news which also led to comprador capital in India and Mexico and Bitcoin because of the problem of the development of fascist power embedded in the Symbolic order of the national development models from the Indian and Mexican bourgeois revolution period which also meant European crisis of this bourgeois revolution periodization because of the failure of Communism. From Soviet Union to Indian Communism, even Chinese market socialism and Cuban state crisis - all of this meant the crisis was Children of Men when Sirohi was preparing his revolutionary studies.

IV. 2019 - 24 - A Short Arc of Incontinence and Revolution in the World

And then of course arcs after arcs of developments from re-structuring capitalism to Renaulitism to in fact mass movements in Cuba, Algeria, China and India and mass line after mass line and even Spanish peasant protests and forms of developments of World Bank, IMF and EU politics towards the regulation of financial power and even the Arab intifadas and

social cycles of movements in Latin America and New Left revisions of leaders, that then in this short period was the Kabbalistic victory of Israel represented in a story of Jewish type - the small developments of financial power of the middle class and lumpen bourgeoisie then is violently attacked by the Messiah who then develops a revolutionary uprising in the guise of in fact the development of a revolution in Intertanglement which then is internationalism in Trotskyism which also frees women to fall in love with the Prophet, as all these developments lead to the discovery of science, love and even psychoanalysis and medical doctoring and even biological science developments all of which fuse into the ruptural unity called Israel which then meets the Prophet who is the meditation of the Kabbalah - when there is a crisis, who will save us - only a Prophet who is Armed, Unarmed, Outcaste. This then is the absolute recoil which develops in one spin the development of cricket history which in another spin is Quran and in a absolute recoil is revolution developing in all parts of India which in a recoil is the dictum - We Will Bury You, Your Grandchildren will Be Communist given to anti-communist fascists in the formation of War Communism under Trotsky. The Kommissar is of course busy developing his theories in Soviet style science and psychoanalysis with books published by one important element in the whole concentric circles of international finance and communist politics - Deterior - a type of gaming, zoning. Designing and even software capital which has the Communist left on it with the journalism and philosophy of German Idealist type of Marxism developing its conjunctures in the world. I call this the climax of the film Children of Men - suddenly it turns into heroes and Communism - something like utopia shines through a house where the Prophet meets Leon Trotsky and Lenin.
